Anritsu Industrial Solutions USA inspection systems are designed to meet the exacting standards set forth by the world's most stringent quality control programs. Whether your goal is the **detection of 0.4mm fe**, non-fe and stainless metal or smaller, online **weighing accuracy as tight as +/- 0.015g at 3 sigma** or **full automatic online contaminant detection** including bone, glass, stone, rubber or metal, Anritsu provides the most accurate solution as proven globally in many head to head trials. Anritsu has protected consumers and our customer's brand and reputation for over 40 years.

No other company offers more standard catalog solutions while maintaining quick lead times and competitive pricing. We invite you to learn more at www.detectionperfection.com.
