RIGHT STUFF EQUIPMENT

VOYAGER

The Right Stuff Voyager Vertical Form Fill and Seal machine is perfect for most bagging applications. Our machine is an intermittent motion machine capable of being integrated with any type of filler/ scale. With cycle speeds up to 120 bags per minute, our vertical form fill and seal machine can handle most product requirements.

With Allen Bradley controls, it is designed to handle your food and non-food production requirements with the features and flexibility your operations and engineering teams need.

SATELLITE

Right Stuff Equipment manufactures an entire line of tray formers, tooling sets, and stocks a full complement of parts. Full service and support are provided by our customer service and in-house engineering teams. The cam-driven design means the machines are quiet, reliable, and low maintenance. There are no pneumatics to maintain or replace. The result is the highest level of Operational Equipment Efficiency (OEE) and lowest Total Cost of Ownership (TCO).

MATERIAL HANDLING

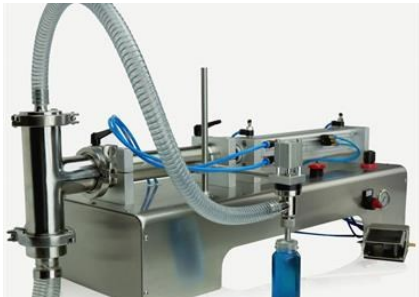

Right Stuff Equipment offers an extensive set of options for material handling equipment for food, beverage and supplement processing. With an in-house engineering staff, fabrication team and project managers, we can provide standard and customized OEM machines. We have the expertise and knowledge to integrate machines to create the optimal processing-packaging line for your products. Here's a look at the material handling equipment we offer:

- ◆ *Accumulation & Unscrambling Tables*
- ◆ *Bucket Elevators & Incline Conveyors*
- ◆ *Carts & Platforms*
- ◆ *Conveyors*
- ◆ *Hugger Transfer Belt Conveyors*

LIQUID FILLING

Our Liquid Piston Fillers come in a wide variety of sizes and handle a variety of viscosities. From 25 ml to 5,000 ml fills, we have the right liquid filler for you. Our liquid fillers give you the option of filling one container at a time via a foot switch or continuously in full auto mode.

The CP1 Counter Pressure Filler is perfect for a brew pub owner who wants to provide a way for patrons to take bottles of their favorite brew home. The CP1 pressurizes the bottle with CO2 to get an oxygen-free space for filling one's favorite craft beer.

INTEGRATION & ENGINEERING

Building the right production line for your products is critical for your efficiency and profitability. Right Stuff Equipment specializes in line design, installation and integration of production and packaging lines. Our team of engineers can customize your system with controls developed in house. Robotics and vision technology provide additional capabilities for automation and quality control.

FABRICATION SERVICES

Right Stuff Equipment offers custom packaging machinery and fabrication services, using our in-house machine and fabrication shop. Our custom packaging machinery fabrication team provides a wide range of services for our customers including:

- OEM packaging machinery modification as needed.
- On-site machine work and welding.
- Custom design and custom packaging machinery fabrication services.
- Guarding on legacy packaging machines.
- Hoppers, stands and conveyors to meet your requirements.

Is a Proud Member of

**The Association for Packaging
and Processing Technologies**

ABOUT US

In the spectrum of packaging equipment companies, Right Stuff Equipment has what it takes to successfully and efficiently design, install and maintain your processing, packaging and material handling equipment. Founded in 2006, Right Stuff Equipment has become a leading packaging equipment manufacturer and integrator, providing both Right Stuff Equipment's branded packaging and material handling equipment as well as OEM processing and packaging machines. Right Stuff Equipment is proud to be a member of PMMI, The Association for Packaging and Processing Technologies.
